KZSVS aims to improve the quality of life of the poorest and most disadvantaged members of the society in Kandhamal district of Odisha through community empowerment. It strives to improve health, sanitation, disaster preparedness, household income and food security and strengthen the CBOs with the capacity to plan and manage their community development activities independently in the long run.

During the year 2011 – 2012 KZSVS has implemented antipoverty programmes i.e. IGPs through the WSHGs, water and sanitation, disaster preparedness initiatives and awareness programme on public health as well as HIV/AIDS to bring about socio-economic changes in the operational area. The programmes were designed to cover the poorest of the poor, marginalized and vulnerable sections in the target area.

Programmatic approach to a large issue seems to be viable than project approach. For sustainability of the programme, KZSVS designed all the programmes through a demand driven, need based, people centered and participatory approach. We have obtained cooperation and support from the people in and out the field through our experience and dedicated staff members.

On the occasion of publication of this Annual Report, I would like to thank all these people, staff and organisations who guided, shared and contributed positively in translating the pro-people programmes. I sincerely thank the District Administration for providing all necessary help to the organisation in materializing the objectives. I am also thankful to the District and Block officials who encouraged and supported us to work effectively and in coordination with the government development agencies.

Last, but not the list, the team members of the organisation deserves a special mention for without their active support it would not have been possible to achieve this spectacular result.

I expect that all these people and organisations will continue to provide their support to the organisation in the future.

Dr. Dinabandhu Maharana
Secretary, KZSVS

Operational Area:
Kandhamal District, Orissa, India

Major Activities

♦ Education
♦ Sports and Games
♦ Cultural Activities
♦ Community Health
♦ Water and Sanitation
♦ Natural Resource Management
♦ Disaster Management

♦ HIV/AIDS
♦ Women Empowerment
♦ Environment & Biodiversity Conservation
♦ Food Security
♦ Self Governance
♦ Celebration of Development Days
Management:
KZSVS is managed by its Apex Body consisting of 07 members known as Executive Body from different fields with wide range of expertise. Dedicated members of the club are the key to make success of the organizations programmes and they are also acting as the major change agents in the area.
NRM, Biodiversity Conservation & Livelihood Augmentation

Majority of people in Khandhamal district depend on land, water, forest and animals for their livelihood. Agriculture, Horticulture and collection of NTFP are the primary source of livelihood of the people in the district. But, livelihood of the people in the district is in stake due to devastation of forest, inadequate land and water conservation and environmental degradation. The problem is associated with the overall socio-economic development of the district.

Since its inception, KZSVS has given top priority to Natural Resources Management and Environment Protection. Several programmes are being undertaken to regenerate green coverage, conserve indigenous meditational plants and protect the environment. During the year the following activities are undertaken by the organisation.

♦ Discussion in village meetings and SHG meetings on environmental protection
♦ Construction of Water Harvesting Structures (WHS), peculation tanks and land development activities under MNREGS
♦ Plantation of indigenous medicinal plants
♦ Road-side plantation by the school children.
♦ Promotion of vermin compost units.
♦ Street play for awareness generation on evil effects of environmental degradation etc.

Construction of Water Harvesting Structures, Percolation Tanks and Land Development under MGNREGA:

The field staff of KZSVS and the volunteers has extended support to the village development committees and SHGs for need assessment and planning before the Palli Sabha and Gram Sabha. For land and water conservation and to take up land development programmes need based plan was developed by the village committees which were presented in the Palli Sabha/Gram Sabha and linked with MNRGES for execution. During the
year, several water harvesting structure, percolation tanks and about 538 Acres of land development programme has been taken in the project villages.

Altogether 54 villages of 5 G.Ps (Budaguda, Kundupanga, Tilori, Kirikuti and Daneibadiin) in Daringbadi Block are tribal dominated villages and the villagers reside in the forest area. They practice shifting and dry land cultivation in the forest area for their livelihood. But they had not the land patta for which time and again they face lot of problem. Several meetings trainings workshops and awareness programmes were organized by KZSVS for orientation of the villagers on Forest Right Act. KZSVS facilitated the process for providing land patta to these villagers under Forest Right Act. In total land Patta of 1010 acres of land was distributed by government to 1291 families of 54 villages.

Followed by distribution of land Patta, the farmers were assisted for taking land development activities in these lands. The district Govt. delegated the responsibility to KZSVS for facilitating the process and providing handholding as well as monitoring support to the farmers for execution of the land development activities under MNREGS. By the time of reporting, out of 1010 acres, land development activities have been completed in 538 acres of land. Now the farmers are happy to cultivate their own land.
This has increased the opportunities for more employment of the farming families there by securing their livelihood.

Gerengakia is a small tribal dominated village situated in the interior pocket of Kundupala GP in Daringbadi Block. Altogether 28 tribal households reside in the village who depends upon land, forest and animals for their sustenance. Most of the families practice shifting/high land cultivation in the forest land to earn their livelihood. For the same they had to face threatening of forest department officials. Local vested interest groups regularly collect carrot from the villagers for making available land patta to them. But since long they were not able to collect the land patta of the land which they cultivate.

The villagers were invited to the workshop and orientation programme on FRA organized by KZSVS. After participating in the awareness development activities, the villagers developed more knowledge and awareness on forest right act. They organized a village meeting and decided to apply for land patta under FRA. They asked for the support of KZSVS for writing the application in the prescribed format. Field staff of KZSVS provided all required supports and the application was submitted. The villagers regularly met the departmental officials and asked for their land patta.

Finally, the department meeting in the village and land was distributed to all village. Further, the district officials conducted a land patta of 25 acres of the 28 families of the govt. approved for taking land development activities in this land under NREGS. The villages enthusiastically involved in the land development activities and completed in within 4 months. Now the villages are happy to cultivate their own land. “We will take care of the land and make it more fertile, because it is now our own land” say the villagers.
**Construction of Vermi Compost Units:**

During the year regular meetings were organized with the farmers club and SHGs on organic manuring. Orientation given to the farmers on use and benefits of green manure, farm yard manure and vermin compost etc. Besides, linkage has been developed with Agriculture department to construct two vermin compost units on demonstration basis with free of cost.

**Avenue Plantation by School Students:**

Regular awareness programmes were organized for the school students on bio-diversity conservation and environmental management. They were also oriented on the evil effects of climate change. Under avenue plantation programme about 1200 plants were transplanted during the year with support of school children. Now the school students are working as change makers by spreading the message to their family members and other villagers.

**Distribution of Medicinal Seeds and Plants to Villagers:**

To protect/conserve traditional medicinal plants, seeds and plants were distributed to villagers in a camp organized by the KZSVS. Medicinal plants like bela, tulsi, neem and karanja etc. are distributed to the villagers to plant in the homestead lands. They are also trained to take care of the plants. Bamboo barricades were also distributed for protection and maintenance of the plants.

**Survey / Identification & Capacity Building of Traditional Healers:**

In the healing practices of herbalists, empirical knowledge plays an important role, as they are able to diagnose certain illnesses with certainty and to prescribe healing herbs for those illnesses.

A survey has been conducted by KZSVS to identify the traditional healers in the project area. Herbalists are ordinary people who have acquired an extensive knowledge of magical technique and who do not, typically, possess occult powers. They are expected to diagnose and prescribe medicines for everyday ailments and illnesses, to prevent and to alleviate misfortune or evil, to provide protection against witchcraft and
misfortune and to bring prosperity and happiness. From the survey, 70nos. of traditional healers are identified. To conserve their knowledge, experience and spread the message of importance of herbal medicines, KZSVS organized several meetings and workshops. Advanced training given to the identified traditional healers on diagnosis of diseases, identification of medicinal plants, preparation of different medicines, and use of medicines etc. Besides, training programme also organized on value addition and packaging of different medicines for its proper preservation.

Parsuram Patra 52 is one among the 70nos. of Vaidyas (traditional Healers) identified from a survey conducted by KZSVS. Parsuram resides in Daringbadi of Kandhamal District in Odisha. Not only Parsuram but his forefathers were also practicing healing and earning their livelihood from the same. Along with agriculture in a small piece of land Parsuram practice healing to earn his livelihood and manages his family of five members.

Parsuram was one among the other participants in the training programme organized by KZSVS for capacity building of the Traditional Healers. His enthusiasm increased and he regularly participated in all the training and demonstration programmes organized by KZSVS on diagnosis of diseases, identification of medicinal plants, preparation of different medicines, use of medicines, value addition and packaging of different medicines for its proper preservation etc.

Gradually the quality of service of Parsuram and demand for his medicine increased in the area. Looking at the acceptance and demand of people, Parsuram has now opened a treatment center of his own and providing more time for treatment of patients. He is now able to earn a good income and able to manage his family much better than better.

“No doubt I am now getting an average income of Rs. 300/- per day but I am really happy that the local people giving me the opportunity to provide service at the time of need to save life of the people of my area”, says Parsuram. Adding further he says, “I would appreciate for clinical test of my medicine but would be much happy if Govt. provides me a recognition certificate for my knowledge and experience to serve people.”
KZSVS has now planned to support the traditional healers in the future and document their knowledge and experience for future generations.

Celebration of Environmental Day:

Environmental degradation and climate change is a burning issue in Khandhamal district. The problem of environmental degradation is associated with the socio-economic development of the people in the area. Considering the issue, an Environmental Awareness Programme was conducted on the eve of World Environment Day at Daringbadi. Local people were aware about the impact of environmental degradation and how to make a pollution free, healthy environment.

SHG members, PRI members, Village leaders and local youths were participated in the awareness development programme.
Public health facilities are hardly reached to the deprived poor of the remote villages. Exploitations by quacks are also a day’s long issue in the area. Due to ignorance and lack of awareness the poor people, in particulate women and children suffers from diseases like malaria, anemia, diarrhea, warsms, skin diseases, eye diseases etc. Considering the issue KZSVS has taken different awareness building programmes i.e. street plays, village meetings, SHG meetings, orientation to school students etc for development of health & hygiene system in the area.

**Awareness Development on Water and Sanitation:**

Public awareness on water, sanitation and health hygiene is an ongoing activity of KZSVS. During the year activities like, village meetings, SHG meetings and orientation programme for school students etc were organised for awareness building and development of health and hygiene and sanitation system in the area. Wall paintings were also done with different awareness messages.

**Awareness Development on Public Health:**

Cultural programmes were organized in the project area on water, sanitation and public health. These programmes are organized on different themes and topics. The objective of organizing such cultural programmes like drama, street plays etc. are twofold i.e.

- Keep alive the traditional values and systems and create a platform for entertainment and
- Awareness generation and orientation on water, sanitation and public health.

The cultural programmes have a very good impact in the area for practice change of the people and the villagers like such programme very much.
Village Contact Drive:

Developing linkage with NRHM programme, Village Contact Drives were organized in different villages of Daringbadi and Kotgarh Block. ASHA, GKS, SHGs, village youth and school children were involved in the contact drive. Village meetings, area meetings, orientation programme on child health were organized to develop awareness among on the villages.

Awareness messages on Dengu, malaria, TB etc. were given to the villagers. Besides, rallies/pada Yatra were also organized and the school children moved around the villages with different slogans on water, sanitation and health issues and its solutions. There is a positive impact of the programme clearly visible in the area.
Orientation to the School Children on Water and Sanitation:

The staff members of KZSVS regularly organize orientation programmes for the school children. It has become a practice in the schools of the area. In the orientation programme discussions held on water chain management, reason for contamination of water, techniques for purification of water, different water born diseases, open defecation and its harms and personal hygienic practices etc.

Field staff of the organization supports the students to develop different models for presentation in the science exhibitions and inter school competition etc.

Promotion of Individual Household Latrines (IHL):

Promotion of IHL is one of the successful programme of the year. The poor people living below the poverty line are mobilized, motivated and linked with the Total Sanitation Programme (TSP) implemented by RWS&S. This year altogether 64 families in four GPs have constructed their low cost toilets. Due to continuous mobilization activities and awareness programmes now these toilets are regularly used by the village peoples.
Health Camp:

KZSVS has conducted 6 nos. of health camps in the year in collaboration with the health department. In the camps pregnant women, children, senior citizens and disabled peoples were given importance for treatment with no cost or low cost. Besides they were also linked with different govt. schemes for them. One of the health camps was specially organised in the year for treatment of eye diseases in the area. The field staff members also support the local Anganwadi workers for successful implementation of the pulse polio programme. Looking at the dedication and enthusiasm of the members, the health department people seek their cooperation for the same.

Support to Mobile Health Unit (MHU) under NRHM:

Linkage has been developed with health department/NRHM for providing services to MHU in the project area. Following services are provided to the MOU for better implementation of health services in the project area.

**Curative**
- Treatment of minor ailments
- Referral of complicated cases
- Leprosy, TB, Malaria treatment and awareness
- Minor surgical procedure & suturing

**RCH services**
- Antenatal check up and related services
- Promotion of institutional delivery
- Referral of complicated pregnancies
- Health check up
- Promotion of Immunization
- Treatment of childhood illness
- Adolescent care such as life style education, counseling, treatment of minor ailments and anemia etc.

**Family Planning services**
- Awareness on family planning
- Distribution of condom, oral pill, emergency contraceptives
Under *Arogya Plus (IAP)* programme KZSVS covered total 4835 households with a total population of 22544 out of which 10748 are male and 11796 are female. As per the micro plan prepared, total no. of Treatment Points are 16 and each treatment points are attended twice by the organization. Altogether 6 staff members (MO, HW, Pharmacist, Social Mobiliser, Driver and Attendant) are engaged in the programme. One vehicle is hired to travel to the Treatment Points and villages. Following results are achieved under the programme.

### Results Achieved from Arogya Plus (IAP) programme

### Diagnostic Services
- ♦ Simple Pathological investigations like Hb estimation
- ♦ RDK test for malaria
- ♦ Slide collection for diagnosis of TB

### IEC/BCC
- ♦ Counseling in RTI/STI/HIV/AIDS
- ♦ Personal/ environmental hygienic awareness
- ♦ Smoking & ill effects of alcohol

### Medicine support
- ♦ Free medicines to be provided to the patients

### Emergency Services
- ♦ The Partner Organization will provide emergency services during any epidemic/ disaster/ public health emergency/accidents, as required by ZSS or Block M.O.
## Results Achieved from Arogya Plus (IAP) programme

### Family Planning Services
- No. of cases mobilized for female Sterilization (in no.) - 154
- Male Sterilization (in no.) - 1
- No. of regular monthly session conducted by MHU - 94
- No of cases facilitated for registration at HWF within 3 months of pregnancy - 449
- No of ANC cases attended - 449
- No of ANC cases given TT - 449

### Epidemic Management & Control
- Halogen tablet distributed (in nos) - 7760
- No of ORS distributed (in nos) - 6045
- IEC Activities
  - Health education session conducted (no.) in villages - 344
  - Health education session conducted (no.) in schools - 74

### GKS Activity
- Regular monthly meetings of Gaon Kalyan Samities
- Development & implementation of Village Health and Sanitation Plan (VHSP)
- Integration of sanitation and nutrition as important component of Gaon Kalyan Samiti activities.
- Immediate community based response to health challenges
- 100% utilization of funds by GKS.
- Implementing Community Based Monitoring of various health services being provided at the village/GP level.

### Strengthening of Gaon Kalyan Samities:
The staff members of the organization had undergone Training on identification of health needs, preparation of health plan, implementation of plan of action, maintenance of accounts and records, co-ordination with different stakeholders etc.
After the training they are now providing handholding support to the GKS on the followings,

- Regular monthly meetings of Gaon Kalyan Samities
- Development & implementation of Village Health and Sanitation Plan (VHSP)
- Integration of sanitation and nutrition as important component of Gaon Kalyan Samiti activities.
- Immediate community based response to health challenges
- 100% utilization of funds by GKS.
- Implementing Community Based Monitoring of various health services being provided at the village/GP level.

Besides, KZSVS had also organized training programme for capacity building of ASHAs in the project area to undertake their responsibilities properly.

Ayurvedic Development Programme:

The founder of the organization, Dr. Dinabandhu Maharana has extensive experience in the field of Ayurveda, Naturopathy and Yoga Sciences. KZSVS organises Naturopathy Awareness Programme for general public, women, school & collage students etc. The awareness programme includes,
♦ Lectures on Wednesday on different aspects of Naturopathy, Health, Diseases, Longevity, Yoga & other drugless therapies by various experts on regular basis. About 100 persons attend this lecture
♦ Health workshop on different health aspects (10 days in a month from 9 am to 6 pm) with natural lunch and drinks. About 130 persons participate in each camp
♦ One Day Regional Language Workshop in any one regional language (3rd Saturday of the month from 9 am to 6 pm) with natural lunch and drink. About 50 to 150 participants participate in each such camp

**Rational use of Medicine:**

With the objective of ensuring therapeutically sound and cost-effective use of medicines by health professionals and consumers KZSVS has organized several orientation programmes for the health professionals as well as consumers. Improving the use of medicines by health workers and the general public is crucial both to reducing morbidity and mortality from communicable and non-communicable diseases, and to containing drug expenditure. To ensure a sound and rational drug use programme KZSVS emphasizes on three elements:

**Rational medicine use strategy and monitoring:** Support in implementing and monitoring a strategy to promote rational use of medicines by health professionals and consumers.

**Rational medicine use by health professionals:** Develop standard treatment guidelines, essential medicine lists, educational programmes and other effective mechanisms to promote rational medicine use by health professionals.

**Rational medicine use by consumers:** Establishing effective medicines information systems to provide independent and unbiased medicine information – including on traditional medicine – to the general public and to improve medicine use by consumers.

**Yoga & Naturopathy Awareness Programme:**

Keeping view the advantages of Yoga and Naturopathy, KZSVS had conducted a Yoga Camp at Daringbadi. Local Yoga gurus were invited to train the villagers. They trained various Yogas and Ashans to the public. Besides, the organization had also conducted a Naturopathy awareness programme at Daringbadi. The points focused on this awareness programme are as below.

♦ To promote and reestablish the use of Ayurvedic medicine.
♦ To promote herbal plants and collection and distribution of herbal medicine.
To establish cause and effect relationship with medicines and nature giving plants.

To maintain sanitation and health care of people of different age group.

To promote plantation of medicinal and herbal plants.

To identify medicinal plants.

Local people appreciated the programme and expressed their interest to participate regularly in such programmes.

**Awareness Programme on HIV/AIDS:**

By all accounts HIV/AIDS has threatened to take the shape of an epidemic. Unless some steps are taken on a war footing it may engulf the entire human kind. At the present knowledge of medical science there is no curative therapy for this dreaded infection. The only way left is its effective prevention which is quite simple. People must know at the first place how to prevent this infection.

The organisation took steps to make the people aware how this infection is spread and how it can be prevented. Programmes like public rally, discussions in SHG meetings, and awareness campaigns were organized on world AIDS day the 1st December. Besides, the staff members of KZSVS also distribute and demonstrate condoms in the rural pockets with support from the local PHC.

**Survey on HIV/AIDS, T.B and Malaria:**

The organization also conducted a survey on most dreaded disease like H.I.V & AIDs, TB, Malaria etc. Field workers were visited the neighbor villages of Daringbadi headquarters and enumerated the no. of patients suffered from these dreaded disease.

Street plays were conducted to prevent these diseases. Victims were counseled secretly. Villagers were trained to prevent from malaria and to consult doctor for taking medicine on malaria. Medicine kits were also distributed to malaria affected patient and their blood samples were also taken for malaria parasite test. The impact of the programme was very effective in the area.
Disaster Preparedness

As per the Disaster History of the State, Kandhamal district is highly prone to communal riots. The common people are at the receiving end in any disaster situation. Thus it is absolutely necessary that people should be informed and educated properly so that they can face any impending situation in a prepared manner. The main objective of the Disaster Preparedness programme was to enhance the capacity of the community, local self governments and CBOs so that they can face any impending situation without panic and fear.

The school children are also given orientation on disaster preparedness including human rights and peace building. Support given the students to organize exhibitions and different models on disaster preparedness in the respective school annual function of the project area schools.

Santi Sadhabhabana Yatra:

Kandhamal district is affected by riots since 23rd August 2008. People of this district are in threat and hopelessness. Every corner of the district is under unmerciful. To overcome the crucial problem of the district and to bring peace and harmony in the district; the organization organized a Shanti Sadhabhaban Yatra in the Block headquarters, Daringbadi on 2nd October 2011 i.e Gandhi Jayanti. A Peace Rally was marched the whole town. Village community and students and teachers of different schools and colleges of the Block were joined in the peace rally.

At the end of the rally a meeting was organized. Resource person from different society and community were delivered their valuable lesson to bring peace in the community and society.

Human Rights & Peace:

To bring communal harmony and peace 4 workshops were conducted in different village of Daringbadi Block. Various human rights issues and communal feeling like caste, creed, religion etc. were highlighted in the programmes. The workshop had a very good impact in promoting communal harmony in the project area.
Sports and Games:

Organizing sports and games are the regular activities of KZSVS. These sports are organized with a view to develop the spirit of sportsmanship within the local youths. Besides such activities also create a sense of unit that supports social bonding. Block level inter panchayat cricket tournament is one among the major sports and games organized this year.

Through this sports and games KZSVS wants to bring social cohesion and a sense of belongingness among the youth of the area. Besides it also supports for good health as a result of physical exercise. Practice and participation in the sports and games increase the self confidence of the village youths and students to participate in district and state level. So organizing sports and games is an ongoing activity of KZSVS.
Strengthening Women SHGs:

SHGs are proved to be a feasible model for social development and empowerment of women. KZSVS is also following the same model to organize women into small viable SHGs and motivate them to work for their own development. Now KZSVS is in the process of strengthening these SHGs so that they can work for their own betterment independently. During the year the organisation has conducted five training programmes for the SHG leaders so that they can understand the concept properly and manage their group in a better way. In the training programme more than 160 members of 42 SHGs those promoted by KZSVS as well as members from “Mission Sakti” groups participated and received training on group management, record keeping, accounts system, government schemes etc.

Besides, small initiatives are also taken for initiating Income generation programmes (IGPs) through the women SHGs with a long term objective of their economic empowerment. The initiate will support the women members for further bank linkages and mobilize govt. schemes.

Vocational Training Programme to SC Women:

A Vocational training programme was undertaken by the KZSVS at Daringbadi, headquarters on 12th Feb. 2010. Women from Scheduled Caste Community were trained in different vocation like, leaf stitching, tailoring, bamboo knitting, pickle, budi and pampad preparing and preserving foods etc. this programme render a good impact to women as it raises their socio economic development.

“We Can” Campaign:

To bring self confidence among the people the organization has organized “We Can” campaign. Through the programme KZSVS aims to create Self confidence, Strength,
Courage, Morality to do any type of ethical and social work among the community members and local youth especially women and adolescent girls.

Training to SC Women on IGP:
Training programme was organized by KZSVS for SC women members on different Income generation Programmes (IGPs) at Daringbadi. Women from Scheduled Caste Community were trained on leaf stitching, tailoring, bamboo knitting, pickle, budi and pampad preparing and preserving foods etc. this programme render a good impact to women as it raises their socio economic development.

Agriculture Development:
Agriculture is the major source of livelihood in the project area and women plays a major role in agriculture. During the year 2 different training programmes were organised for WSHG members on improved agronomic practices, marketing and post production value addition etc. Members from farmers clubs also participated in the training programme.
Strengthening Community Based Monitoring System:
Community Based Monitoring Groups (CMG) is formed at village and Gram Panchayat level to monitor the quality aspect and timely implementation of different Government programmes at village level. Members of the CMG are trained on participatory planning, monitoring and social audit etc. The involvement of CMG has ensured the quality of implementation of Government programmes to a great extent.

The process of social audit is streamlined in five G.Ps (Budaguda, Kundupanga, Tilori, Kirikuti and Daneibadiin) of Daringbadi Block with facilitation support from KZSVS. The district Government has delegated the responsibility of facilitation the social audit in these Gram Panchayats. As a result of the social audit the accountability of different functionaries and PRI etc. and the quality of different development work is now increased.

Strengthening Local Self Governance:
Since its inception KZSVS is involved in strengthening Gram Swaraj and self Governance system. The organization is trying to have a good and perfect governance system in the village level. To aware the community on good governance system KZSVS have organized number of trainings and workshops with PRI representatives, village youths, SHG leaders etc. During the year following activities are done to strengthen self Governance system in the area.

- A study conducted in 3 Panchayats (Daringbadi, Budaguda and Gumikia) on newly elected PRI representatives.
- Several awareness camps organized at village level for youths and women SHGs on Good Governance system in PESA region. There are 6 numbers of such camps have organized during last year and more than 200 participants from the villages attended the programme.
A cadre of Youths at Village and Gram Panchayat level are motivated to act as change makers for ensuring effective PRI system and regularizes Palli Sabha and Gram Sabhas.

- Awareness development to ensure free and fair process in Panchayat election.
- Initiatives to increase the Polling percentage
- Awareness development for selection of Good leaders as PRI representatives.
- Awareness development to minimize Rejection of votes.

Besides the above, village and Panchayat level meetings were also organised on MGNREGA and FRA with the help of Vasundhara. Awareness campaign organized on RTI in 3 panchayats (Daringbadi, Budaguda, Gumikia) in Daringbadi block of Kandhamal district.
KZSVS takes special interest to celebrate several national celebration days with its members and the public as participants. The following days were specially celebrated for healthy growth of local community. A list of the days that are celebrated this year is given in the table.

The ways forward:

We are determined to cast our magical spell on the sands of time in the coming days. For that we need to follow a holistic approach that emphasizes on nature centric policies and adoptions to changing environment. We need to carry forward the commendable job that the brigades of our social activists have taken up because we believe that development as a process do not have any final definition. Thus we must internalize the harsh reality of nature and make an all-out attempt in our battle against social odds.

Thus, in future we look forward to……..

- Emphasizing on decentralizing development
- Intensify community based development initiatives for the rural poor
- Focus on Gender, Water & Sanitation, Health, HIV/AIDS, NRM, Bio-diversity Conservation, Livelihood and Community Based Disaster and Risk Management practices
- Take necessary steps to increase the area of operation
- Mobilize more funds from govt. and non govt. organizations.
- Increase the organisations own source of income to make the initiative sustainable
- Establishing new relationships and partnerships along with other grass root level organizations for erection of common platform, forum and federation for communities’ development.
While concluding ..... 

As the time spreads its wing to soar to new heights of limitless sky, we are consistently challenged by fathomless problems and its multitude strings of complexities. How we manage our resources and how well we cope up with the changing dynamism of social orders will answer the eternal queries like what’s next and whether we survive in long run or not? But like silent intellectuals we are busy pondering over our weak links. The areas like fund raising, documentation and networking among local voluntary groups certainly deserves our special attention and treatment. But at the same time we are not overlooking the glorious achievements we have pocketed during last year's. We would like to sum up these positive achievements and imbibe moral strength for future course of action .....
